SEMA IN MONTH

OCTOBER

Introduction

The Syrian Medical Association for Syrian Expatriates (SEMA): It is a humanitarian, medical relief, non-profit, national organization; it has no association with political systems, parties or ideologies. All its humanitarian relief work shall be provided to all without regard to race, sex, color, religion, sect, denomination or language.

Monthly Report: Sema in a month

The monthly newsletter aims to highlight the achievements and projects sponsored by the Association and provide a clear idea for the followers of the Association about the amount work in these projects through various statistics, in addition to cover the events in which the Association had participated with detailed reports on the activities of the Department of Training and Education and courses that With a brief description of the number of medical devices that the Engineering Office has repaired or maintained.

Success stories

Mustafa recovers from jaundice after receiving treatment

We share with you another story from life's experiences, despite the harsh circumstances. Mustafa, a child, arrived at one of SEMA Hospitals suffering from jaundice accompanied by a high fever.

The doctors immediately intervened and admitted him to the intensive care unit, where phototherapy was applied to break down the jaundice-affected cells. Mustafa started showing improvement and began to recover, with a bright future awaiting him. See his picture from inside one of the nurseries.

Success stories

Our children are no longer hearing impaired today.

For a child with hearing loss, it's like being alive but without a life. No education, no friends, and no communication with family. A deaf child cannot walk alone on the street or lead an independent life in any way!

But you changed this equation entirely, and the sad story became just a memory in the lives of 96 children in our recent campaign to distribute hearing aids. You have inspired the world by forever changing the lives of these little ones. Witness the profound impact you have made and give another child a chance with a medical hearing aid. Because an impairment that can be overcome is not a disability.

Watch this video to see the impact:

SEMA reaches Gaza

We would like to express our heartfelt gratitude and deep appreciation for your generous support and significant contribution in achieving this historic milestone of reaching the besieged Gaza Strip and delivering a shipment of medical aid to Al-Shifa Medical Complex two days ago, in collaboration with the Relief Committee of the Arab Physicians Union.

Your immense empathy reflects the spirit of community and solidarity, as well as the shared human values and ethics, in delivering the much-needed medical assistance, consumables, and surgical supplies to the besieged Gaza Strip.

You have truly made a difference in the lives of hundreds of thousands of people in Gaza. We will never forget your kindness and generosity. Dr. Marwan Abu Saada, the Director of International Cooperation at the Ministry of Health in Gaza, expressed his gratitude and appreciation in a recorded message for receiving the medical aid, particularly the surgical instruments and related supplies, especially those needed for vascular and bone surgery.

Breast Cancer Awareness Sessions for SEMA Hospitals

In support of the global campaign that kicks off in October to raise awareness about breast cancer, SEMA Hospitals, including Al-Ikhah, Al-Farabi, Muadh Abu Mahdi, and Idlib Surgical Specialized Hospital, organized joint awareness sessions on breast cancer last week. The sessions were attended by several specialized doctors and healthcare workers.

These sessions covered important information about breast cancer, its symptoms, risk factors, preventive measures, as well as how to perform self-examinations and routine breast screenings.

Watch some highlights in this video report:

watch this visual report on the functioning of the axial tomography device.

We invite you to watch this visual report on the functioning of the latest axial tomography device in Idlib, two months after its arrival at the specialized surgical hospital in Idlib.

The CT scanning device is considered a vital tool in healthcare as it provides precise and comprehensive images that aid in diagnosing medical conditions, determining optimal treatment plans, minimizing harm, and providing further guidance for surgical and radiation therapy. It is also one of the newest and completely free devices available for multi-slice imaging. Find out more in this report
